

# BIOGRAPHY

29 June 2012

---

## Title and name

Dr. Dorte Lau Baggesen

---

## Nationality

Denmark

---

---

## Panel

Panel on Biological Hazards

---

## Education

Doctor of Veterinary Medicine (DVM), 1988, Royal Veterinary and Agriculture University of Copenhagen

Ph.D. in Veterinary Microbiology, 1992, Royal Veterinary and Agriculture University of Copenhagen

---

## Scientific and risk assessment experience

My general working experience has been focused toward NRL functions on salmonella and other food borne pathogens, quality assurance, molecular epidemiology, laboratory-based food borne disease surveillance and outbreak detection and response. In addition, I have been active in research and private and governmental consulting in relation to control of food borne pathogens in food animal and vegetable production and in the food production line covering the conventional as well as organic production.

I participate in several national committees on control of Salmonella in the primary animal production and slaughter lines (poultry, pig, and cattle), risk assessment and management of manure and other animal by-products and on research needs in relation to development of the organic food production sector.
